(Designation) Sanitary Engineer to Government.

To The Secretary to the Government of Madras,

Local Self-Government (P. H.) Department.

Sir,

1304

Your Memo No. 7282-1-D2-P.H. dated 25-2-30.

Bellary Water Supply is a non-house-connection scheme designed on the basis of a supply of 7 gallons per head per day. As such, increase in the number of connections to the water mains in localities already provided with an adequate number of fountains should be discouraged unless absolutely necessary. However in almost all the Water Works in the Presidency, exceptions have been made in the case of religious and charitable institutions of the nature of temples, mosques, choultries etc. The same concession may be allowed in the case of Bellary, with the following safeguards.

1857/873

(i) A meter should be fixed in the connection and only one ½" waste-not tap allowed.

(ii) The quantity of free allowance to each institution should be fixed by the Council at the time of sanctioning the connection and any excess consumption over this should be charged for at the rate of 12 annas per 1000 gallons.

(iii) All water used for tanks in or near temples and mosques should be separately metered with reference to explanation (d) to Section 131(3)~~(d)~~ of the Act and charged for without any free allowance.

(iv) Approval of the Sanitary Engineer should be got for the detailed plans and estimates for each connection.

The Council may be advised to be very sparing, in availing of this concession and submit proposals only for such institutions as have no public tap close by and stand in real need of a service connection for domestic purposes.
